UI Prototype Document

I. Introduction

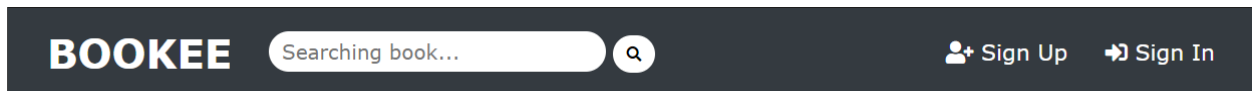

This document has a purpose of providing the UI Prototype of the BOOKEE website by. These key scenarios were sketched following the description in the Use Case Specification.

The scope of this document is to deliver to client and user the view of how the BOOKEE system would be after the development and is also the guideline for the team to follow and develop the GUI of the system.

II. Navbar

Navbar for different roles will be different:

1. User before sign in

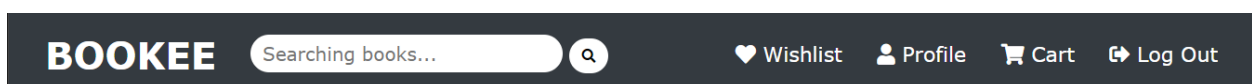

Component	How to use
The logo (BOOKEE)	Click to go to homepage screen
Searching bar	Users enter name of book they want to search
Magnifying glass icon	Click to go to the screen containing books that match the name (III.3.2)
Sign Up	Click to go to sign up page (III.3.1)
Sign In	Click to go to sign in page (III.1.2)

2. Admin

Component	How to use
The logo (BOOKEE)	Click to go to homepage screen
Searching bar	Enter name of book you want to search
Magnifying glass icon	Click to go to the screen containing books that match the name (III.3.2)
Waiting Post	Click to go to waiting post page containing registered books waiting to be reviewed (III.2.1)

Footer contains links to other pages of the admin team for easier communication such as Facebook, Twitter, Instagram,... and watermark.

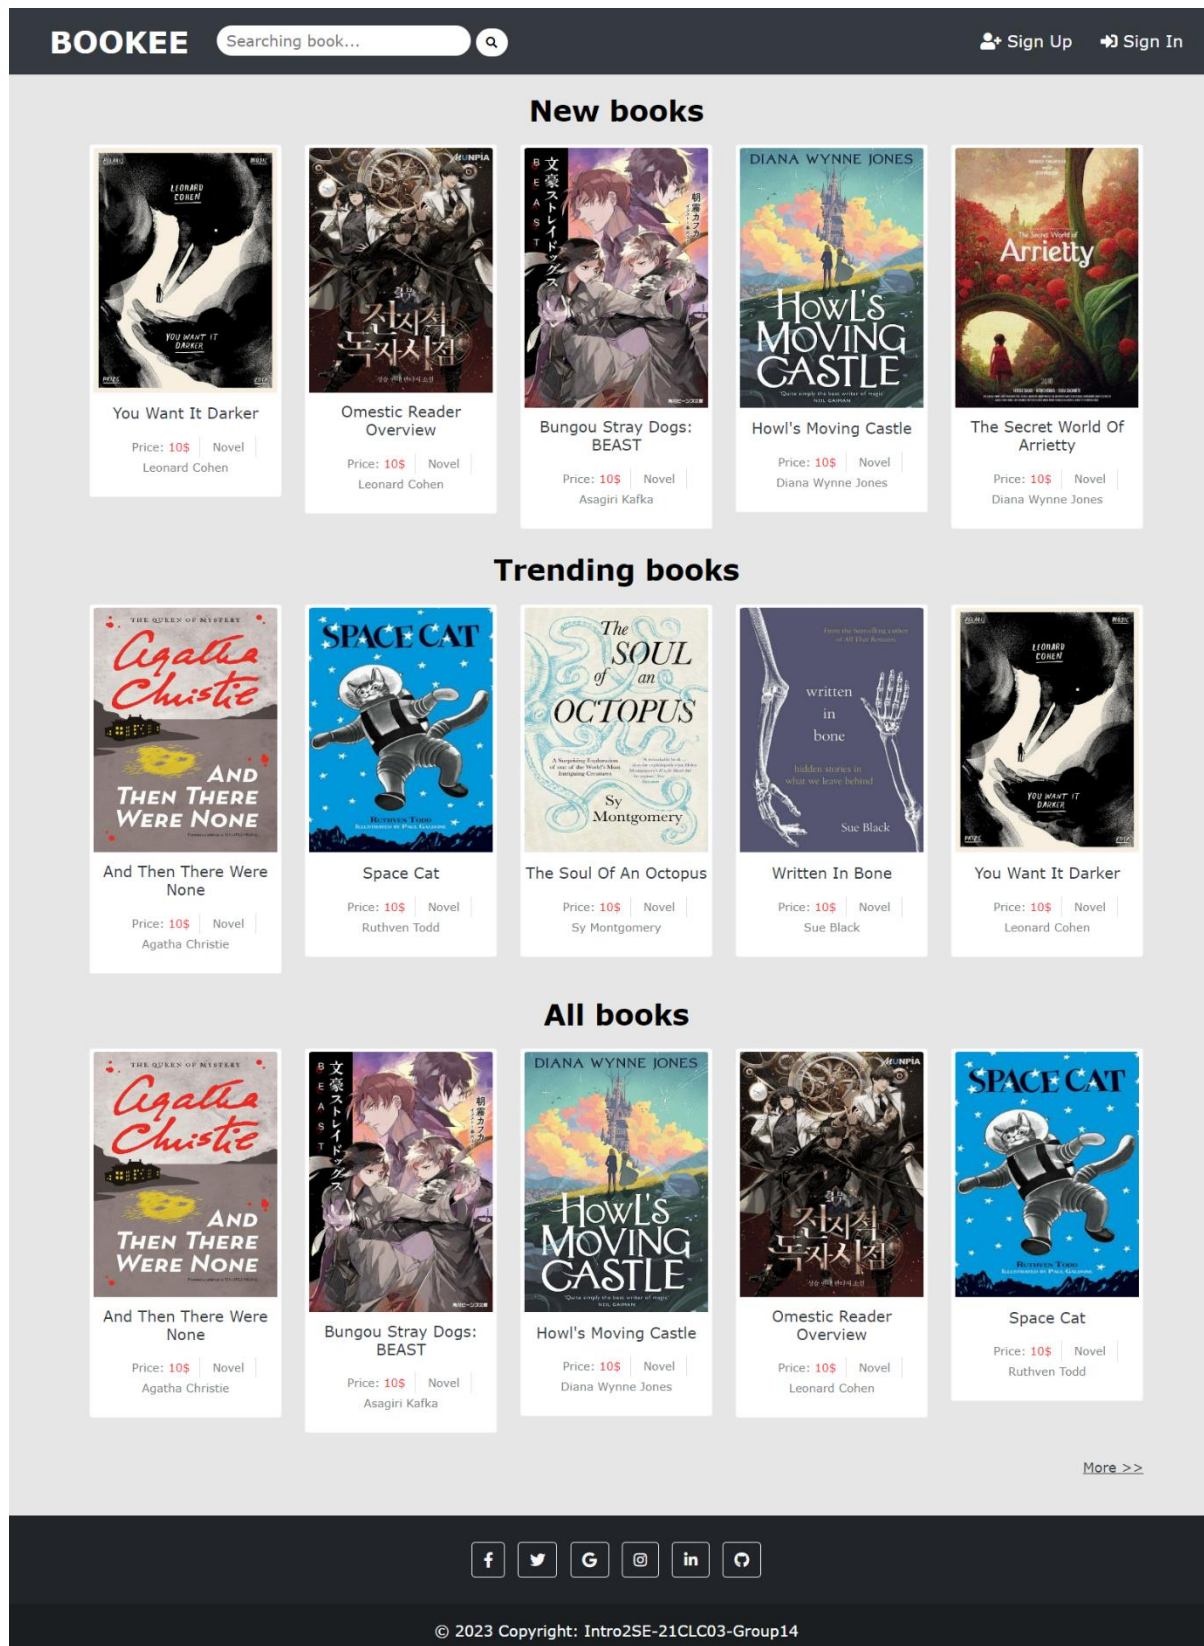

IV. Screens

1. General screens

1.1. Homepage before sign in

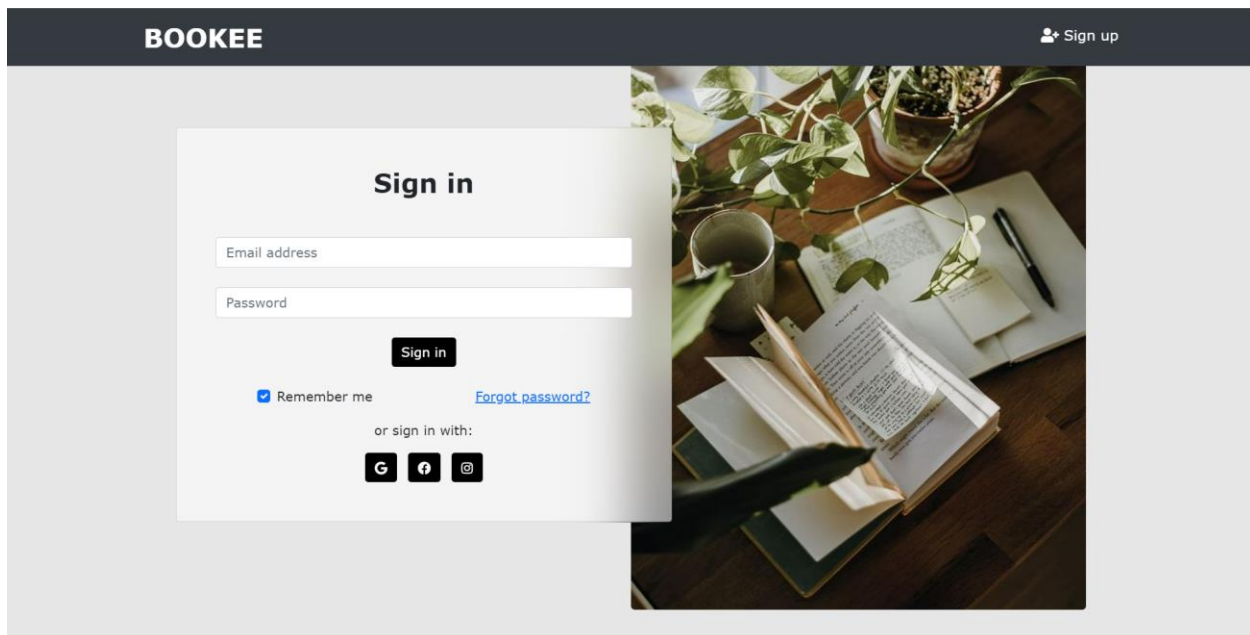

- Homepage is the first screen displayed when users access the website. It includes 3 main sections: new books, trending books and all books:
 - New books: List of newest books
 - Trending books: list of the most purchased books
 - All books: all books listed for sale on the website, by default there will be 5 books displayed. If the user wants to see the remaining books, click on the "More >>" button to see more.
- Below each book will include some basic information such as book title, author's name, price. To view detailed information of the book, users can click on the image or name of the book.
- For each role on the website there will be a different navbar, details are presented in part II of this document.

document identifier	

1.2. Sign in screen

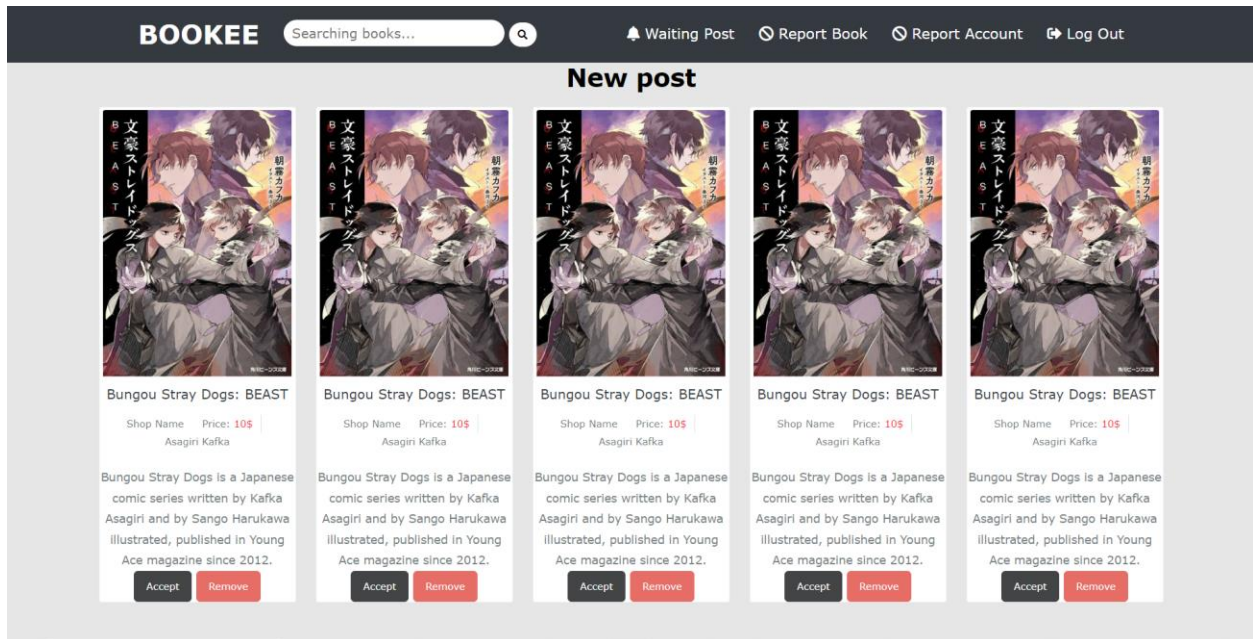

- The login page of the website has a user-friendly and easy-to-use interface to provide a convenient experience for users accessing the system. Below is a basic description of a login page:
 - Sign in form: The center of the page contains a login form, including input fields for necessary information. There are two main fields: "Email address" and "Password." In proximity to the input fields, there is a "Forgot password" button to reset the password if users forget.
 - "Sign in" button: A large button or box to click "Sign in" helps users perform the login process.
 - "Remember me" button: A checkbox to remember login information helps users save time for the next login.
 - "Sign up" button: If users don't have an account, there is a "Sign up" button in the upper right for them to create a new account.
 - Sign in with Social Media Account Options: Many websites provide the option to log in with social media accounts such as Facebook, Google, or Instagram. These options are often displayed near the "Sign in" button.

2. Admin's screens

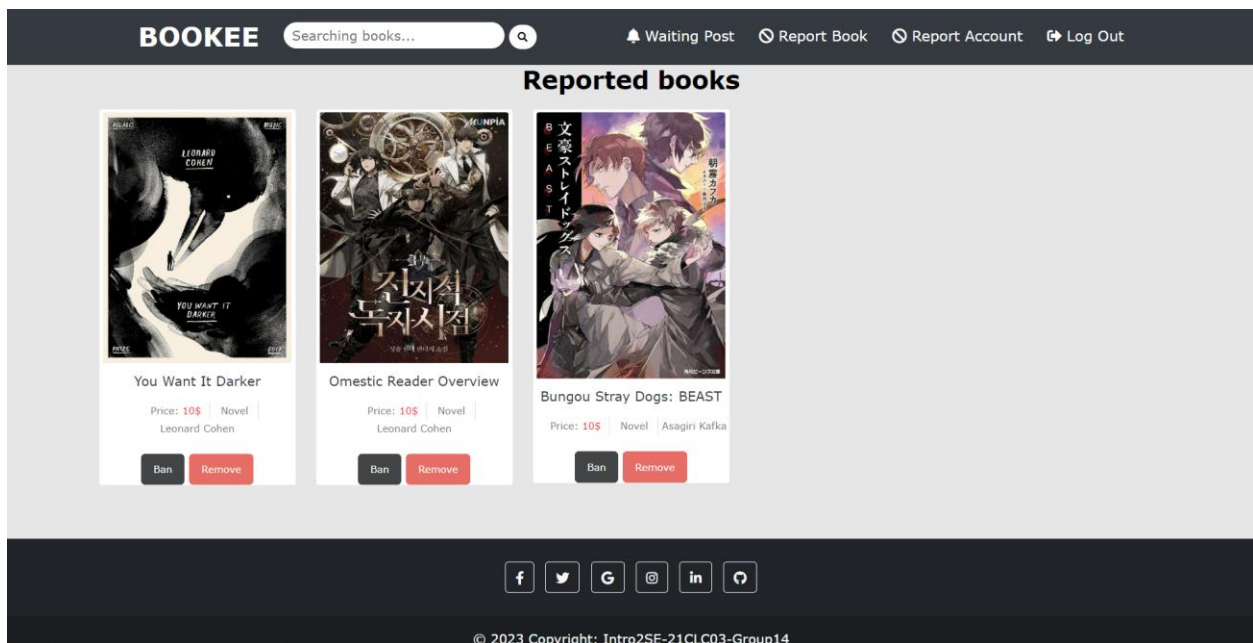

2.1. Waiting list

BOOKEE	Version: 1.0
UI Prototype Document	Date: 16/12/2023
document identifier	

- This is the page displaying a list of waiting posts. Each post will display detailed information so that the admin can easily check it.
 - Waiting List: List the waiting post in an appealing manner and show the information of each post.
 - Button Accept and Remove: Allows admin to accept the post when click Accept button and remove out of list (if there is invalid information) when click Remove button.

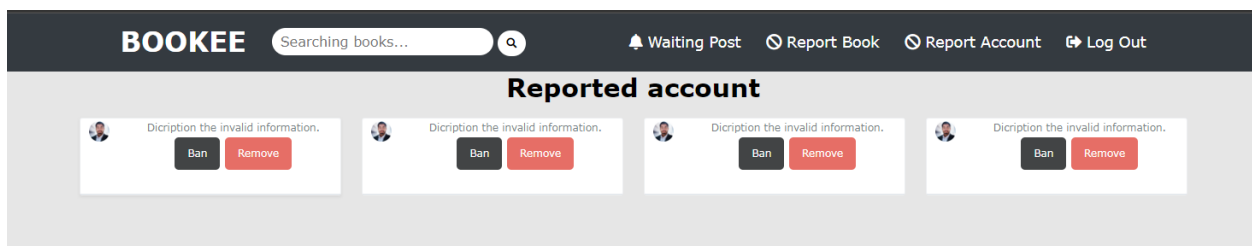

2.2. Reported books list

BOOKEE	Version: 1.0
UI Prototype Document	Date: 16/12/2023
document identifier	

- This is the page displaying a list of reported books, each of reports will display the book and the description from the users.
 - Reported list List reported product products in an appealing manner which will show the book and the detailed description about the invalid information of this book, so that the admin can easily check it.
 - Button Ban and Remove: Allows admin to ban the reported book when clicking the Ban button and remove it from the list (if there is no invalid information) when clicking the Remove button.

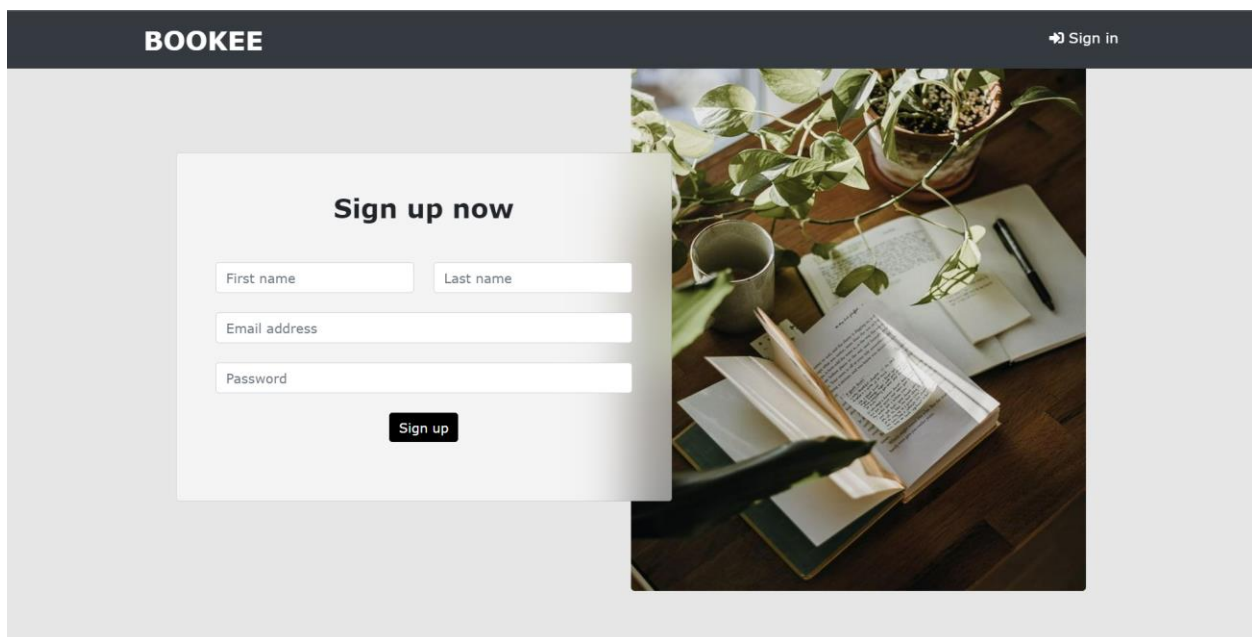

2.3. Reported accounts list

- This is the page displaying a list of reported accounts, each of reports will display the book and the description from the users.
 - Reported Account List: List reported accounts in an appealing manner which will show the account and the detailed description about the invalid information of this account, so that the admin can easily check it.
 - Button Ban and Remove: Allows admin to ban the reported account when click Ban button and remove out of list (if there is no invalid information) when click Remove button.

3. User's screen

3.1. Sign up screen

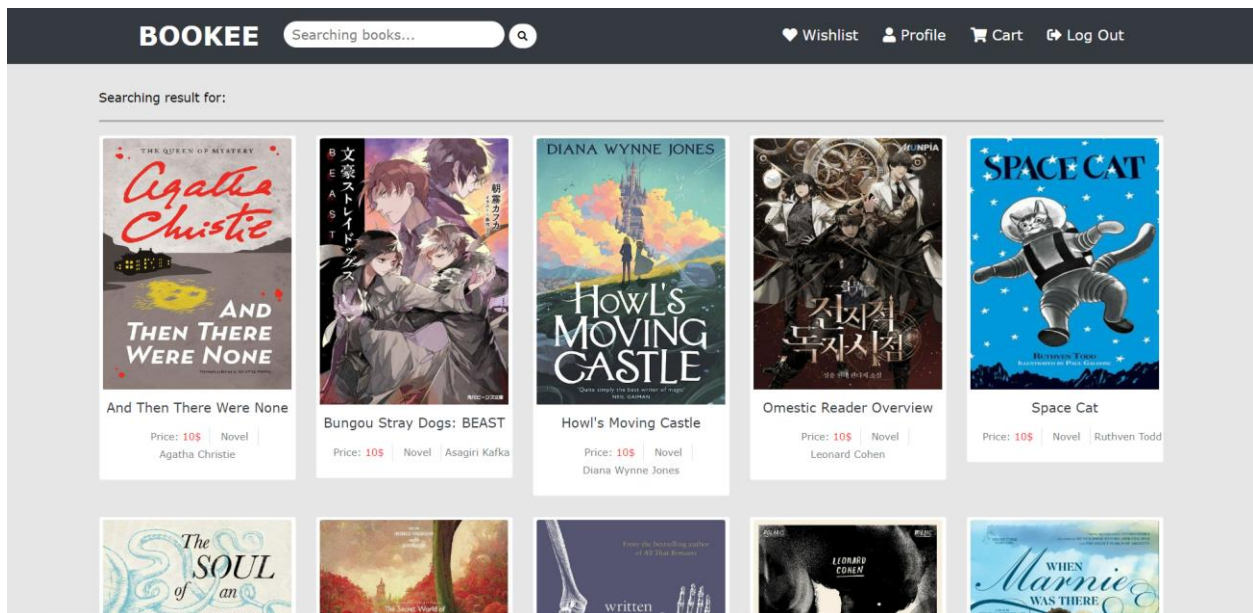

- This screen allows users to register a new account to be able to use more features of the website.

BOOKEE	Version: 1.0
UI Prototype Document	Date: 16/12/2023
document identifier	

- To create a new account, users need to fill in all required information then press the "Sign up" button:
 - First name and last name are the full name and name that the user wants to give to their account (can be real name or any nickname) during the process of using the website.
 - Email address
 - Password: password to log in next time

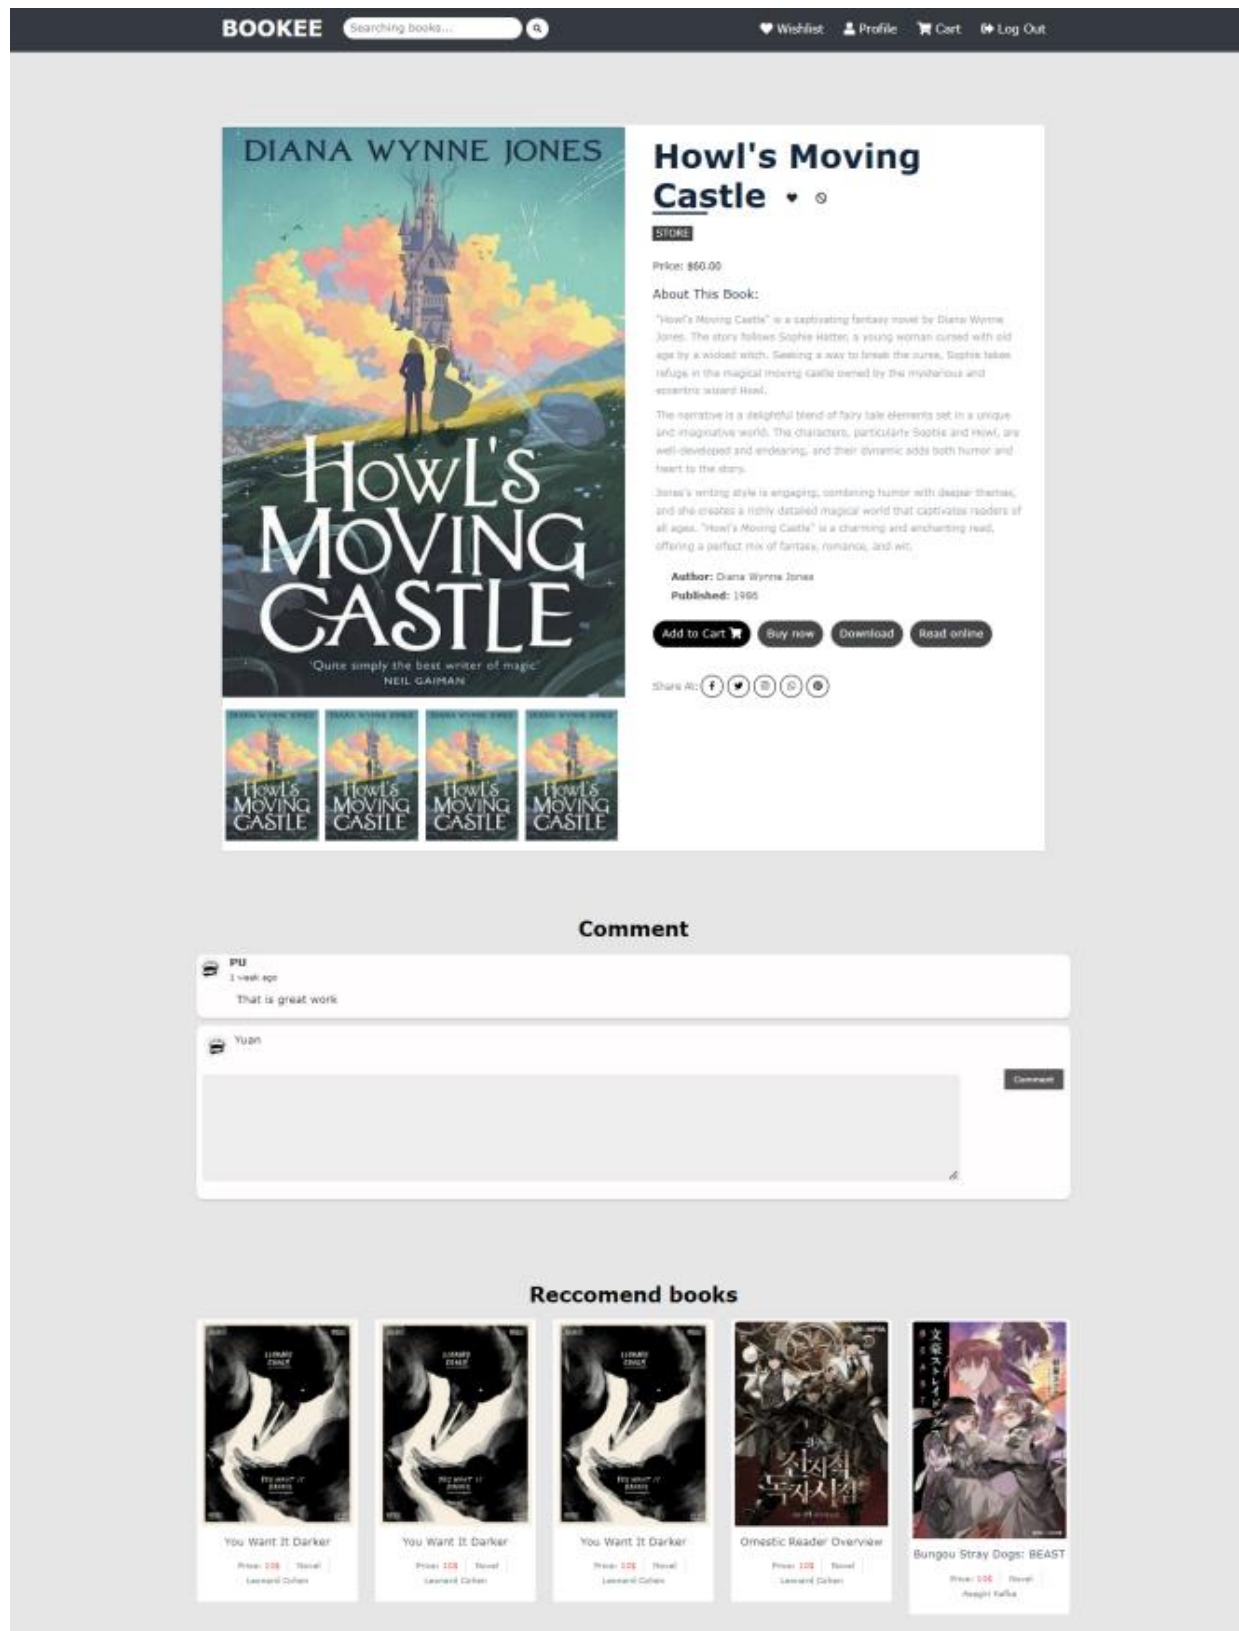

3.2. Searching screen

- After entering the name of the book you want to search for and clicking on the magnifying glass icon, the website will move to the searching screen
- This page will return results for books whose names contain the words entered in the search bar

3.3. Book detail

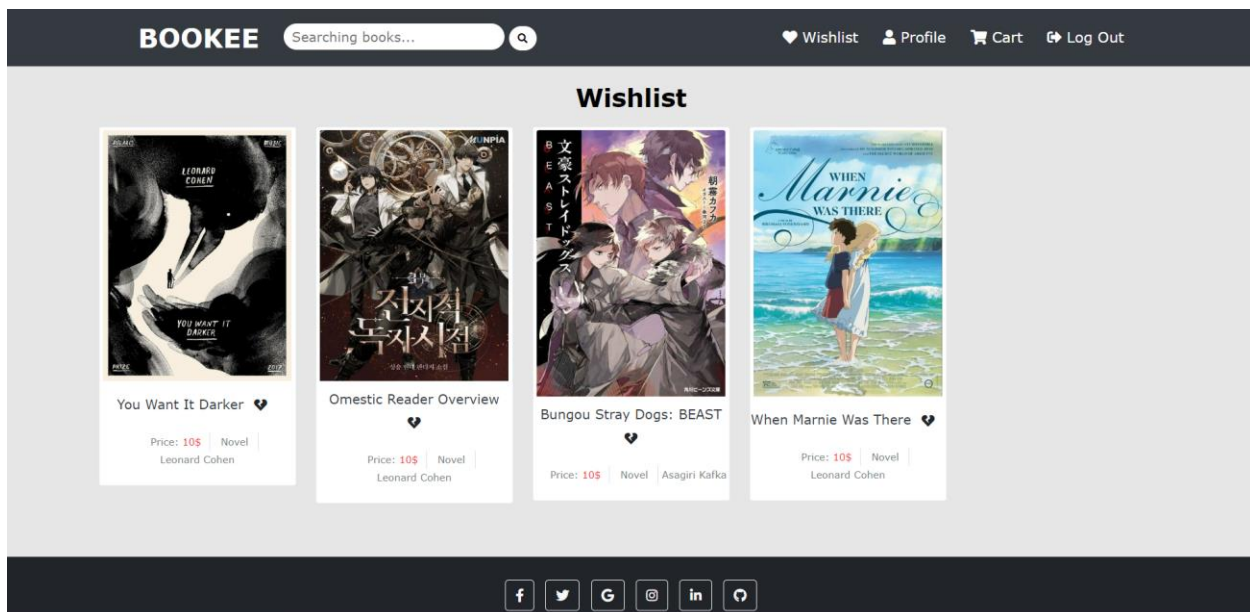

BOOKEE	Version: 1.0
UI Prototype Document	Date: 16/12/2023
document identifier

document identifier	

- This page will be the place to display detailed information about the product. It includes the overview, the price, the author, the published date and the shop name of this book. There are some buttons with different functions for the user. And a comment box for feedback about this product so that users can consider.
 - Product Images: The first image is the cover of this book and the other are some primary pages of this book.
 - Product Details: This section may contain a detailed description of the product, including the overview, the price, the author, the published date and the shop name of this product.
 - "Add to Cart" or "Buy Now" button: Allows users to add the product to the cart or proceed to purchase if they choose "Add to Cart". And if the users choose the "Buy Now" button, this will be moved to payment pay.
 - "Download" button: Display after payment was successful and allowed users to download the book.
 - "Read online" button: Allows users to read it on the web after downloading it.
 - Reviews and Comments: Reviews from other users. A box to enter your comment and a button to submit it.
 - Share and Like Button: Allows users to share the product detail page on social media or like the page.
 - Recommended book: Displays other products or similar items that users may be interested in.
 - Wishlist button: if the user likes this product and wants to add it to the wishlist then they can click the heart button to add to the list.
 - Report button: if the user detects any invalid thing about this product, they can click the "cross" button and this will display a box of report for the user to enter the description.

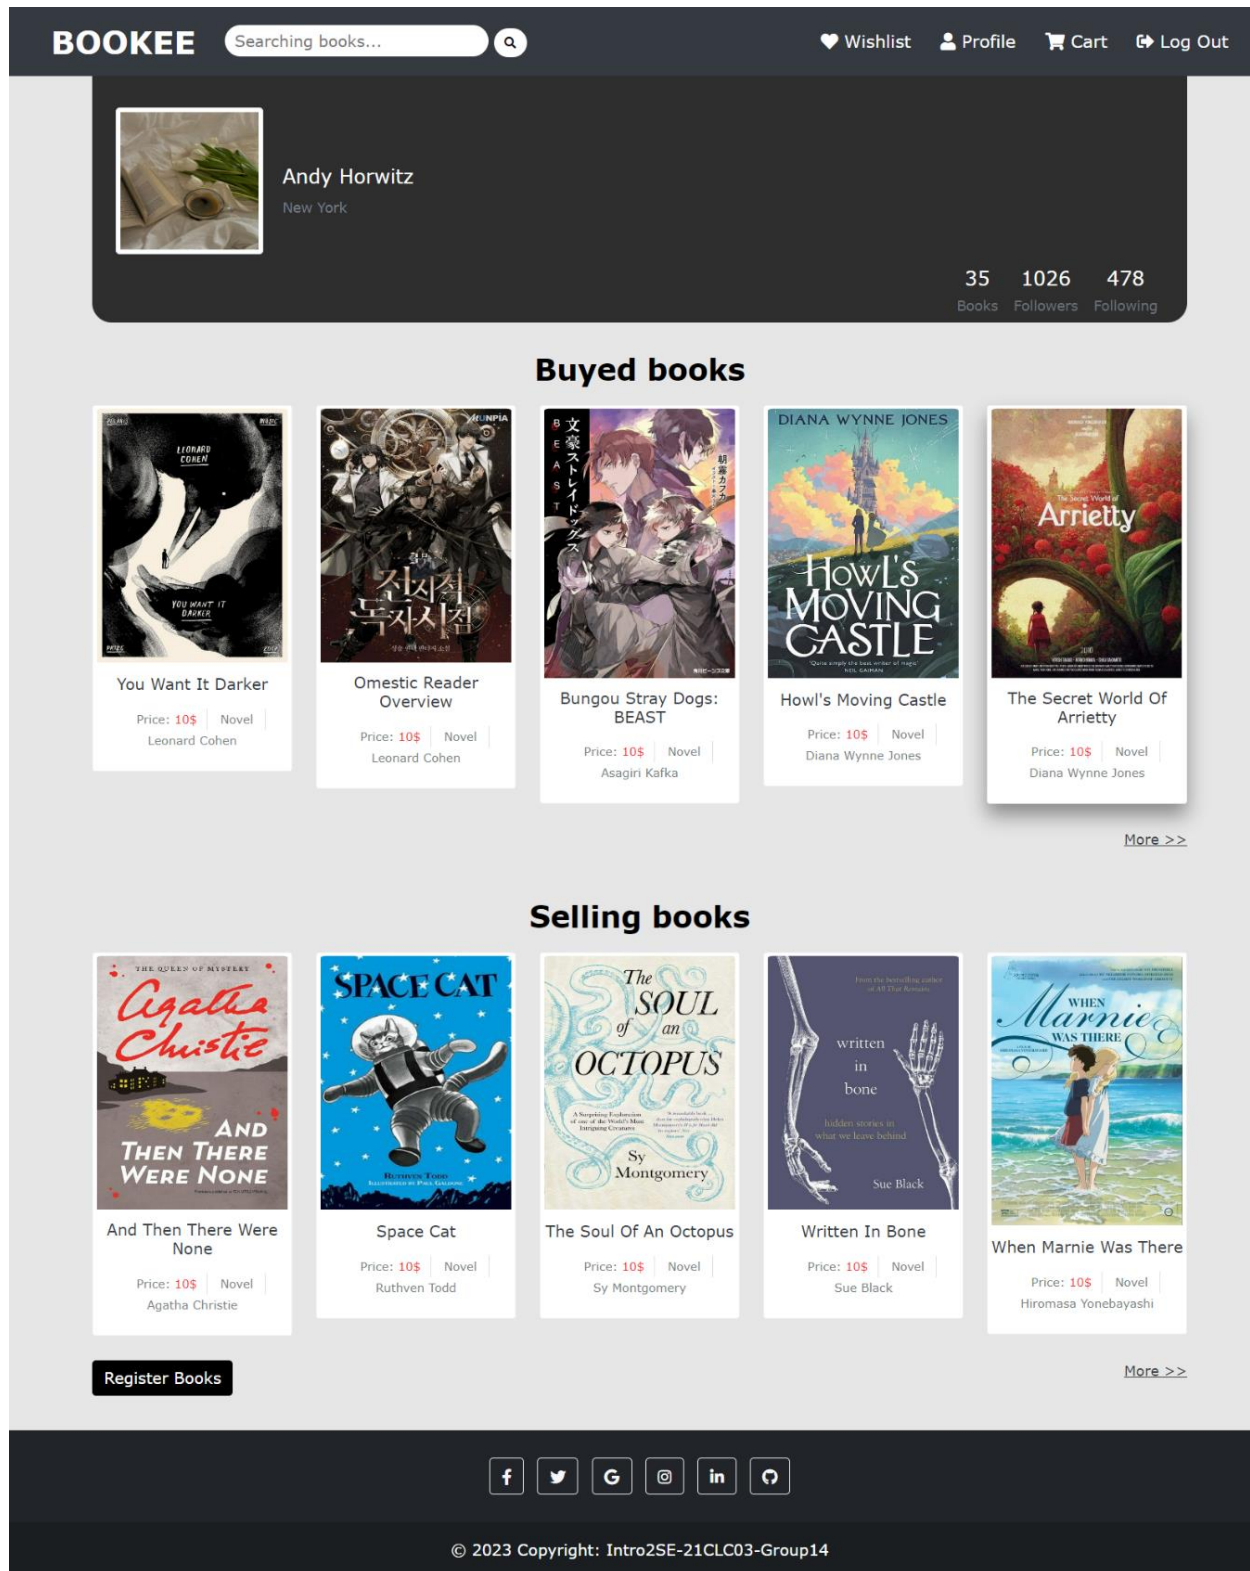

3.4. Wishlist

- Wishlist is a page containing a list of books that users have clicked on the "favorite" button for ease of tracking and purchasing in the future.
- Similar to the homepage, users can click on the image or name of the book to see detailed information about that book.
- If users want to remove a book from wishlist, they need to click on the broken heart icon next to the book title

BOOKEE	Version: 1.0

document identifier	

3.5. Profile

BOOKEE	Version: 1.0
UI Prototype Document	Date: 16/12/2023
document identifier	

- Profile screen shows some personal information about the user such as:
 - Avatar
 - First name and last name user set when registering for new account
 - The number of books that person has listed for sale
 - Number of followers and number of other users who that user follow (following)
 - Purchased books: the list of books that the user has purchased. If the user wants to see the remaining books, click on the "More >>" button to see more.
 - Selling books: the list of books that user is selling. If the user wants to see the remaining books, click on the "More >>" button to see more.
- If users want to post new books for sale, they need to click on the "Register Books" button and follow the steps in section III.3.7. The book will be posted on the website after being reviewed and approved by the admin.

3.6. Register book

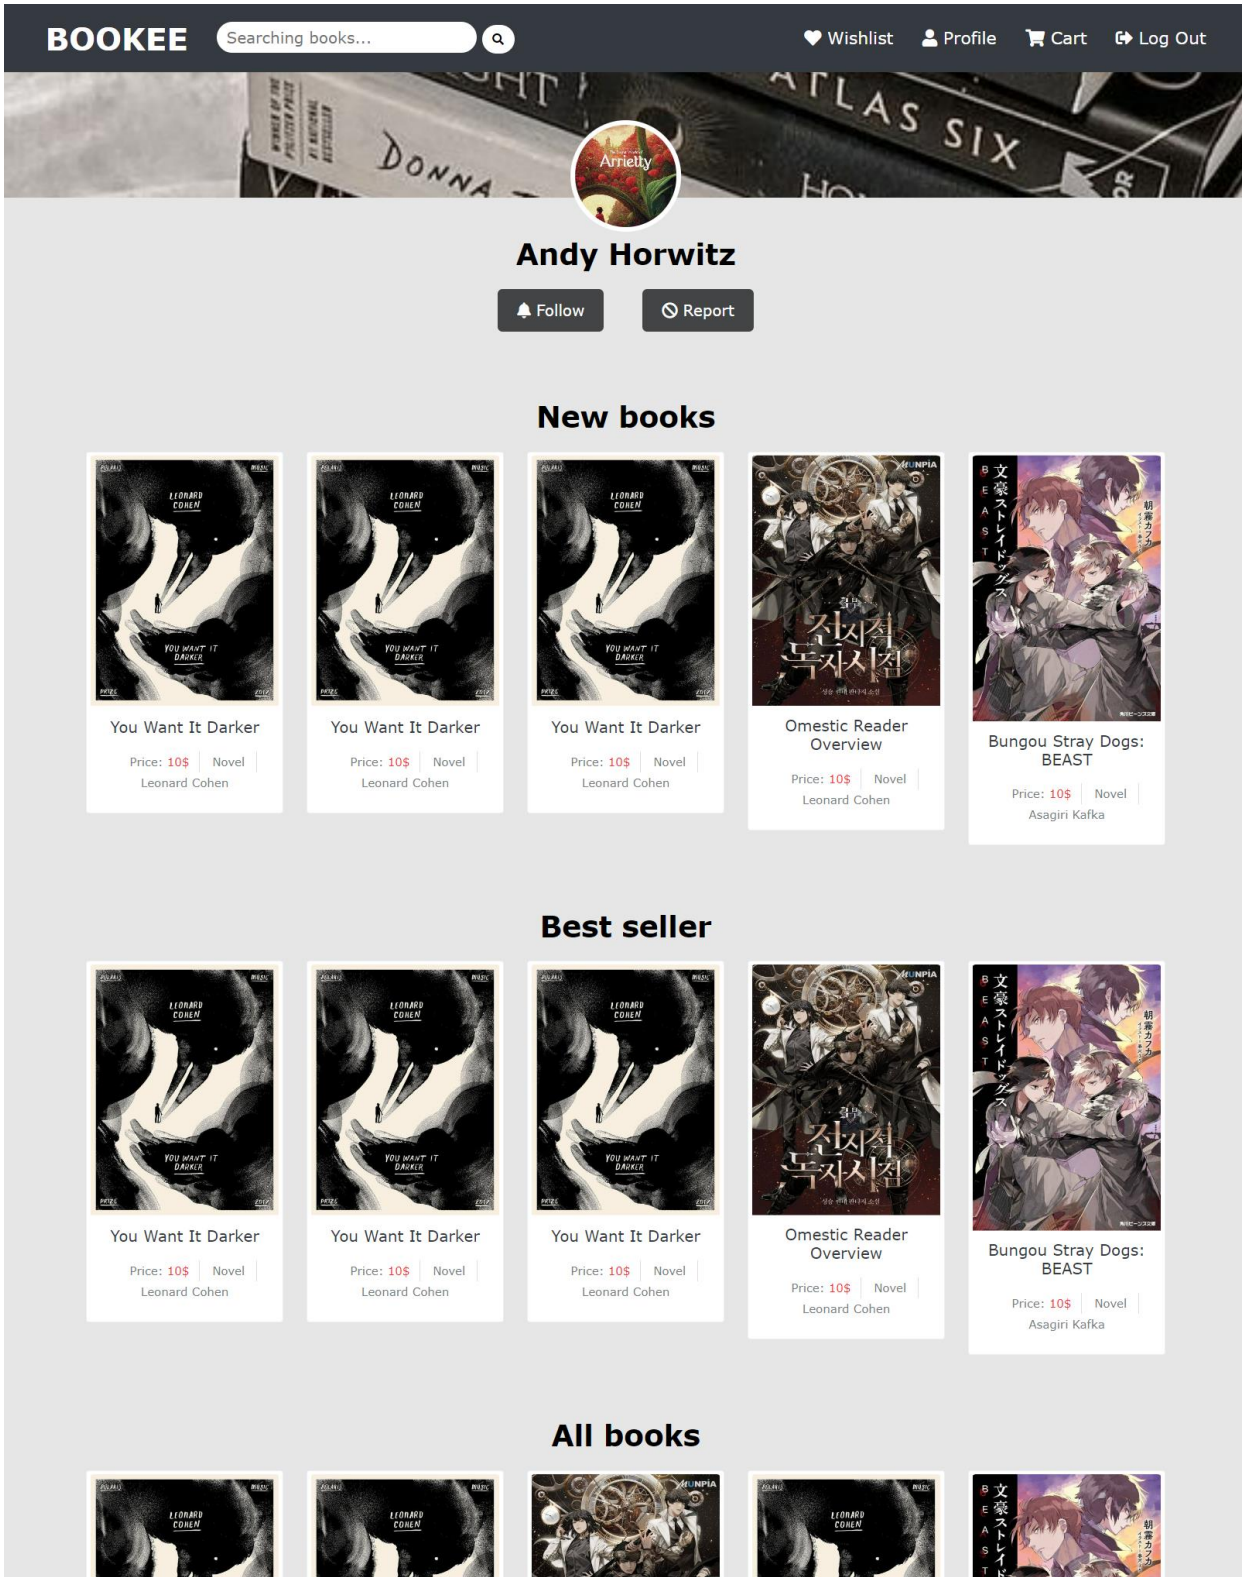

The screenshot shows the BOOKEE website interface. At the top is a dark navigation bar with the logo 'BOOKEE', a search bar with the placeholder 'Searching books...', and links for 'Wishlist', 'Profile', 'Cart', and 'Log out'. Below the navigation bar is a light gray sidebar. The main content area features a white 'Register form' box. The form includes the following fields and options:

- Cover of the book:** A file upload section with a 'Choose File' button and the text 'No file chosen'.
- Link drive:** A text input field.
- Name of the book:** A text input field.
- Price (\$):** A text input field.
- Genre:** A section with multiple checkboxes for 'Novel', 'Romance', 'Horror', 'Science fiction', 'History', 'Cookbooks', 'Poem', 'Thriller', 'Autobiography', and 'Other'.
- Brief discription:** A large text area for writing a brief description of the book's content.
- Submit:** A black button with white text at the bottom of the form.

- To post a new book for sale, users need to provide all necessary information in the form above such as:
 - Cover of the book (choose an image file)
 - Link drive: link drive of the book
 - Name of the book
 - Price (in dollars)
 - Genre of the book: This is a multiple choice, users can choose multiple genres on the list of available genres, if outside the list click on "Other" box.
 - Brief description: a summary of the book's content. This is quite an important part because it is the part that will attract buyers.
- After filling in the above information, press the "Submit" button. After being reviewed and approved by the admin, the book will be sold on the website.
